IMPACT RESISTANCE & ENHANCED PROTECTION MIL STD

Toogood Cases passed the CRIQ lab drop certification test. This testing confirms that Toogood Cases is MIL-STD-810G 517.7 compliant.

To achieve this certification, tablet equipped cases are dropped 26 times on each face, corner and angle. All from a height of 48". The tablet must properly function after each drop and not sustain any damage to the screen.

PROTECT WITH STYLE

Functional & Intelligent

Toogood Cases are designed to maximize all of your tablet's features, all while being aesthetically pleasing and ruggedized thanks to its polymer casing.

Our cases allow easy access to all tablet features, including speakers, headset jack, camera and charging ports.

Customizable

Toogood Cases facilitate schools to showcase their unique identity. Personalization options apply to every part of the case, inside-out, from the antibacterial polymer casing to the elastic webbing. You can even have a student's name embossed on the outer spine.

Unbeatable quality and service

With a wide selection of cases, we also offer our clients prototypes for new designs. Our large variety of specialised materials, patterns and models, along with our team's keen eye for aesthetics, give you the opportunity to realise a case that will reflect your school's values.
